

ASX RELEASE 09 MARCH 2022

Further Drilling to test extension of VMS style mineralisation at Belele

Drilling has recommenced at Desert Metal's 100% owned Belele prospect

A series of reverse circulation holes using a deeper capacity rig will test the extension of the recently intersected VMS style mineralisation. These new holes will test for grade and width along strike to the north and at depth. (see DM1 ASX release 24 February 2022).

Access tracks and drill pads are also being prepared at Dingo Pass to test several very high conductance anomalies which may be caused by massive sulphide mineralisation (DM1 ASX release 30 November 2021). These discrete bedrock conductors lie within mapped mafic intrusive rocks, are within several kilometres of the interpreted Craton margin and have coincident nickel, copper and PGE anomalism in soils. Drilling will begin following the program at Belele.

The Dingo Pass program is being co-funded by the State Government Exploration Incentive Scheme (EIS) with a grant of \$150,000. The EIS directly supports explorers in Western Australia through a competitive program which offers co-funding to innovative exploration drilling projects.

Authorised by the Board of Desert Metals Limited.

Competent Person Statement

The information in this announcement that relates to Exploration Results is based on, and fairly represents, information and supporting documentation prepared by Dr Rob Stuart, a competent person who is a member of the Australasian Institute of Mining and Metallurgy. Dr Stuart has a minimum of five years' experience which is relevant to the style of mineralization and type of deposit under consideration and to the activity which he is undertaking to qualify as a competent person as defined in the 2012 Edition of the Joint Ore Reserves. Dr Stuart is a related party of the Company, being a Director, and holds securities in the Company. Dr Stuart has consented to the inclusion in this announcement of the matters based on his information in the form and context in which it appears.
